- 16-piece wrench set for bicycle applications with torque control including Wera Clique-Torque wrench A 5 (2.5-25 Nm)
- Sockets and bit sockets for the most popular screw profiles on road bikes, mountain bikes and e-bikes
- Easy setting and saving of the desired torque value with audible and tactile click when the scale value is reached (click 1)
- Safely quantified force: when the set value is reached, the torque wrench triggers audibly and noticeably (click 2)
- Precision of ±4 % as per DIN EN ISO 6789-1:2017-07.

The 16-piece set from the screwdriving tool specialist Wera solves the most important screwdriving problems associated with bicycles, with reliable control of applied torque to protect sensitive components. With a click-torque wrench in the unmistakable Wera design. Very robust design with high accuracy as per DIN EN ISO 6789-1: 2017-07. Easy setting and saving of the default values. The audible and tactile snapping on reaching the scale values also facilitates the safe setting of the desired torque values. The robust release mechanism guarantees a clearly audible and tactile trigger signal when the set torque is reached. For clockwise torque-control and with a reversible 45-tooth ratchet. The torque wrench is extremely space-saving and supplemented with accessories that are suitable for the torque range and adapted to the most common screwed connections on bicycles; in a robust, surface-friendly textile box. Included are: Click Torque A 5, 1/4", 2.5 - 25 Nm, 4 sockets with 1/4" drive, 7 Hex Plus hexagon bit sockets and 4 TORX® bit sockets. Sockets and bit sockets with Take it easy tool finder with colour coding by size - for easy and quick location of the required tool. Bit sockets with holding function for extra comfortable screwdriving without the screw falling off the tool. Incredibly compact arrangement for a lot of tools in a small space. Textile box with very high robustness and longevity. Additional surface protection through the textile outer material. Low weight and volume for easier mobility. Bit sockets with all the benefits of Wera bit technology such as fitting accuracy, wear resistance and concentric run-out properties.

For the road and the workshop

The Bicycle Set Torque 1 contains tools for the most popular screw profiles on road bikes, mountain bikes and e-bikes. With the included Click-Torque A torque wrench (2.5-25 Nm), torque-sensitive screwed connections can be tightened reliably. Clear and compact tool storage in the textile box.

Click-Torque Wrench series

Click torque wrench in unmistakable Wera design.

Exact

Precision of ±4 % as per DIN EN ISO 6789-1:2017-07.

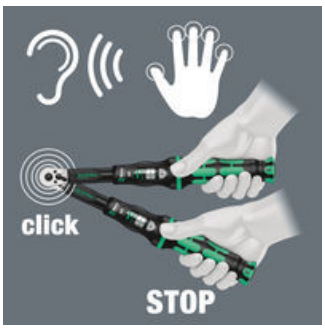
Easy and safe

Easy setting and saving of the desired torque value; easy to read on main and fine scales.

Setting with Speed

With audible and tactile locking when the scale values are reached.

Release mechanism



On reaching the desired torque value, an audible and tactile mechanism is triggered.

Bit sockets with retaining function for hexagon socket screws

The clamping of the screw is achieved by a flexible locking ball. The holding function is especially helpful in confined, hard-to-reach spaces, where there is no room for a second hand to secure the screw.

Manual and machine sockets

The manual and machine sockets can be used both for hand and power tools use (non-impact). Users need just one socket set for all applications.
