

Product data sheet

1847-23

EAN-No. 4000896285327

Length: 178 mm · $\pm 10\%$

Application:

For OETIKER® clamps StepLess® type 168 and type 192 and ToothLock® type 292 – particularly for electric vehicles

- Patented clamping jaw design with precise guidance for a controlled clamping and locking process, as well as precise, repeatable installation results, e.g. using the torque wrench HAZET 5110-3CT (10–60 Nm) – please follow the instructions of the manufacturer!
- For the reliable installation of axle boots on cardan shafts
- Controlled force application with uniform pre-tensioning of the clamp to ensure gentle force transmission and reduce the risk of damage to the boot or faulty locking
- High process reliability and consistent installation quality to ensure a permanently secure seal for the axle boot
- Ideal for working in confined spaces on the axle boots of cardan shafts
- Robust design for professional workshop use and mass production, combined with ergonomic handling

Application
