Benefits.

High-quality set of 9 robust IMPACT socket wrench sockets 5-19 mm for socket head screws in a wide range of applications.

Made from wear-resistant Chrome Alloy Steel and gunmetal finish for high durability and corrosion protection.

The socket bar can be attached in a structured manner: via an integrated drilled hole, on plastic carriers or directly to metal surfaces using the magnet set.

The 1/2" square drive makes it optimally compatible with all common ratchets, extensions and drive handles.

The inserts sit firmly on a clip strip with sliding plastic holders, external square and ball lock.

Product highlights.

For every task.
Our high-quality set of IMPACT sockets in the most common sizes and with universal square drive is a reliable tool for screwdriving work on special tools for brakes and wheels, engine mounts, industrial components and much more.

Safe and durable.
Our screwdriver and socket sockets made of high-quality Chrome Alloy Steel offer excellent stability and resistance for continuous use. They have a black gunmetal finish for additional corrosion resistance.

Efficient tool organisation.
The inserts sit securely on the robust socket wrench strip with external square, ball lock and end stop. The sliding safety locks allow for individual arrangement. For maximum flexibility, the strip can be attached to walls, beams or directly to metal surfaces using a magnet set - for more order and space in the workshop or garage.
