Incredibly fast Zyklop Speed ratchet with pivoting ratchet head and 5 predefined locking positions

Zyklop “6 in 1”

1. Fine-tooth ratchet 2. Flex-head ratchet 3. Angle ratchet 4. Quick-release ratchet 5. Power ratchet 6. Screwdriver

Bit sockets with holding function for TORX® screws

The HF tools developed by Wera are ideal because they feature an optimised geometry of the original TORX® profile. The wedging forces resulting from the surface pressure between the drive tip and the screw profile mean that TORX® screws made according to Camcar Innovations, Michigan, USA specifications are securely held on the tool!

Bit sockets with retaining function for hexagon socket screws

The clamping of the screw is achieved by a flexible locking ball. The holding function is especially helpful in confined, hard-to-reach spaces, where there is no room for a second hand to secure the screw.

Sockets with retaining function for hexagon headed bolts, screws and nuts

The clamping of the screw is achieved by a twin spring loaded ball retention system. The tubing is effectively protected against mechanical wear and tear by a steel ring. The holding function is especially helpful in confined, hard-to-reach spaces, where there is no room for a second hand to secure the screw.

Take it easy tool finder system

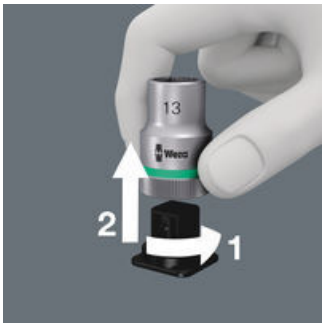

Take it easy tool finder system - with profile and size colour-coding for quick and easy tool selection. Colour-coded system for hexagon drive screws (L-Keys, Zyklop bit sockets), external hex drive screws and nuts (Joker wrenches, Zyklop sockets and Zyklop bit sockets with holding function), and TORX® drive screws (L-Keys, Zyklop bit sockets).

Nut extractor tool

This tool enables hexagon nuts to be easily removed from sockets with holding function.

Secure hold and easy removal

The all new smooth turning mechanism guarantees both secure and rattle-free storage, yet allows easy removal of the tool.
