

BITORSION

TAKE IT EASY TOOL FINDER

RAPIDAPTOR TECHNOLOGY

MAGNETIC

EAN:	4013288179821	**Size:**	145x80x25 mm
Part number:	05057430001	**Weight:**	257 g
Article number:	Bit-Check 30 BiTorsion 1	**Country of origin:**	CZ
		Customs tariff number:	82079030

- BiTorsion bits for long service life
- Quick-release chuck with Rapidaptor technology
- Take it easy tool finder: colour coding according to profile and size
- The Bit-Checks by Wera are extremely compact and are therefore the ideal companion for mobile applications.
- Upright positionable Bit-Checks convince due to their functionality in a minimum of space

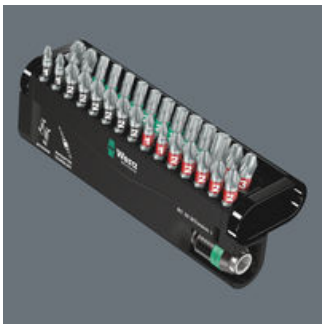

Tough-absorbing bits for universal use. BiTorsion bits with a torsion zone - where kinetic energy is diverted from peak loads. This greatly extends the product service life. Offer the best possible service life with the appropriate holder. Comes with Rapidaptor technology, which allows bits to be attached without any need to actuate the sleeve. The removal of the bit is simple, just by pushing the sleeve forward - for rapid bit change with just one hand. For the take-up of bits with 1/4" hexagon head drive as per DIN ISO 1173-C 6.3 und E 6.3. For insertion in the power screwdriver or into the chuck of the power drill. The multi-component Bit-Check is convincing on account of its low weight and the maximum possible degree of compactness. In this respect, the soft material in the lower section of the Bit-Check ensures that the bits are securely held whilst being simple to remove at the same time. The profile and size of the bits are easy to recognise thanks to the Wera Take it easy Tool Finder with its colour coding and clearly visible imprint.

At the workplace

The Bit-Checks can be positioned upright at the workplace so the tool is always quickly to hand.

BiTorsion Bits

Premium bits with torsion zone into which kinetic energy is dissipated during peak loads. With softer BiTorsion zone to prevent the bit tip from twisting at high loads. This significantly increases product life. Tough design for universal use.

Rapidaptor holder

Lightning-fast bit change without any extra tools. One-handed operation. With fast-rotating sleeve for easy wielding of the screwdriver.

Chuck-all

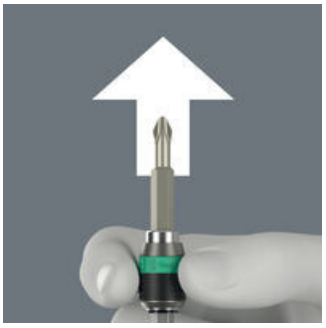

The Rapidaptor quick-release chucks hold ¼" DIN ISO 1173-C 6,3 and E 6,3 as well as Wera series 1 and 4 bits.

Rapid-in and self-lock

The bit can be pushed into the adaptor without moving the sleeve. The lock is activated automatically as soon as the bit is applied to the screw. Bits are held securely and wobble-free.

Rapid-out

Simply push the sleeve forward to change the bit. The spring mechanism lifts the bit off the magnet and unlocks the tool. The bit can be easily removed. The rapid-out function makes it easy to remove even the smallest bits without extra tools.

Single-hand function

Every function of the Rapidator quick-release chuck, such as inserting or releasing bits, can be carried out with one hand. This is faster, more economical and more ergonomic. There are no unnecessary manoeuvres.

Magnetic

Bitholders, magnetic, for easier application of the screw
